

**AMENDED AND RESTATED AMENDMENT AND NOTICE TO PROCEED  
WITH THE CONSTRUCTION PHASE PURSUANT TO THAT CERTAIN  
AGREEMENT FOR TURNKEY DESIGN AND CONSTRUCTION ENERGY SERVICES**

This Amended and Restated Amendment and Notice to Proceed with the Construction Phase (this "Amended and Restated Construction Amendment") is executed and made effective as of [March \_\_\_\_], 2023 by and between the **Mt. Diablo Unified School District**, a **California K-12 School District** ("Public Agency"), and **Schneider Electric Buildings Americas, Inc.**, a Delaware corporation ("Design/Builder").

This Amended and Restated Construction Amendment amends, restates, and replaces the Original Construction Amendment (defined and described below) in its entirety and is executed pursuant to and made part of the Agreement (defined and described below). The Agreement, as amended by this Amended and Restated Construction Amendment, shall be referred to herein as the "*Amended Agreement*", and any capitalized terms used but not defined herein shall have the respective meanings ascribed to such terms in the Agreement.

**RECITALS**

**WHEREAS**, the Parties previously entered into that certain Agreement for Turnkey Design and Construction Energy Services dated as of Wednesday, April 27<sup>th</sup>, 2022 (the "*Agreement*"), whereby the Public Agency engaged Design/Builder to design and construct a Project, as described therein;

**WHEREAS**, pursuant to Section 1.4 of the Agreement, following review of Design/Builder's Project Proposal at the end of the Design Phase, Public Agency is given the option to terminate the Agreement or move forward with the Construction Phase;

**WHEREAS**, the Parties entered into an Amendment and Notice to Proceed with the Construction Phase dated as of Wednesday, May 11<sup>th</sup>, 2022 (the "*Original Construction Amendment*"), thereby commencing the Construction Phase;

**WHEREAS**, at the time the Parties executed the Original Construction Amendment, Design/Builder had not developed a Project Proposal for the full scope of the anticipated Project, however Design/Builder had completed Design Work for the Project scope described in Exhibit D of the Original Construction Amendment ("*Project Scope 1*");

**WHEREAS**, Public Agency and Design/Builder elected to execute the Original Construction Amendment at such time so that Design/Builder could commence Construction Work on Project Scope 1 while continuing to develop the Project Proposal for two additional scopes of work that the Parties anticipated including in the Project;

**WHEREAS**, Design/Builder has now provided Public Agency with an updated Project Proposal that includes one of the two additional scopes, and Public Agency wishes to expand the Project scope based on such Project Proposal while Design/Builder continues to develop the final Project Proposal;

**WHEREAS**, in furtherance of the foregoing, the Parties wish to amend, restate, and entirely replace the Original Construction Amendment with this Amended and Restated Construction Amendment, with the understanding that the Parties may again amend and restate this Amended and Restated Construction Amendment if the Parties agree to include additional Project scope based on Design/Builder's final Project Proposal; and

**WHEREAS**, Public Agency has reviewed this Amended and Restated Construction Amendment and has determined by a meeting of its Counsel that the Amended Agreement will be in the best interests of the Public Agency and will satisfy all of the requirements of California Government Code Section 4217.12.

**NOW, THEREFORE**, in consideration of the foregoing and of the respective rights and obligations of the Parties set forth in the Amended Agreement, the Parties hereby agree as follows:

### **I. CONSTRUCTION AMENDMENT**

The following provisions shall modify, supplement, and become part of the Agreement, as applicable:

**Section 1. Amended Agreement.** This Amended and Restated Construction Amendment and all of the Exhibits attached hereto (i) amend, supersede, and entirely replace the Original Construction Amendment and all of the Exhibits attached thereto, and (ii) are hereby made part of the Agreement as if set forth in full therein. In the event of any conflict between the provisions of the Agreement and the provisions of this Amended and Restated Construction Amendment, the provisions of this Amended and Restated Construction Amendment shall prevail.

**Section 2. Scope of Construction Services.** In accordance with Section 2.2 of the Agreement, the Scope of Construction Work to be performed by Design/Builder in connection with the Project is set forth on Exhibit D, attached hereto and incorporated in the Agreement by this reference.

**Section 3. Construction Time.** In accordance with Section 2.3.1 of the Agreement, the Preliminary Construction Schedule, setting forth the Completion Date for the Construction Work and any applicable milestone dates, is attached hereto as Exhibit E and incorporated in the Agreement by this reference.

**Section 4. Project Fee.** In accordance with Section 2.4.1 of the Agreement, the Project Fee is set forth on Exhibit F, attached hereto and incorporated in the Agreement by this reference. The Project Fee is inclusive of the Design Fee (such Design Fee having been rolled into the Project Fee pursuant to Section 1.4.2 of the Agreement).

**Section 5. Notice to Proceed.** As Construction Work was commenced upon execution of the Original Construction Amendment, this Amended and Restated Construction Amendment does not need to serve as a Notice to Proceed with the Construction Work; however, Public Agency hereby authorizes and directs Design/Builder to continue performing the Construction Work in accordance with Exhibits D and E hereto.

**Section 6. Mobilization Payment.** Notwithstanding Section 2.4.3 of the Agreement, a Project Mobilization Payment was made upon execution of the Original Construction Amendment and a second Project Mobilization Payment for Project Scope 2 will need to be made upon execution of this Amended and Restated Construction Amendment.

**Section 7. Performance Services.** Beginning on May 11, 2022 and continuing for 2 years, the Public Agency shall receive the services described in the Performance Assurance Support Services Agreement ("PASS Agreement"), attached hereto as Exhibit G and incorporated herein by this reference, (the "PASS Services").

**Section 8. Projected Savings.** Notwithstanding anything to contrary, Design/Builder is not providing any energy or efficiency savings guarantees in connection with the Project or the Contract. However, the savings anticipated to be generated from this Project are set forth in Exhibit H, attached hereto and incorporated herein by this reference.

**Section 9. Taxes.** Section 8.2 of the Agreement is hereby deleted and replaced in its entirety with the following:

"Based on the scope of work, this agreement will be treated as a construction contract. The price excludes all present or future sales taxes, excise taxes, value-added taxes, import and export duties and any other taxes, surcharges or duties now existing or hereafter imposed by Government authorities upon services quoted by the Contractor. If applicable, upon acceptance of this agreement, Customer shall provide Contractor a valid copy of any applicable tax exemption certificate for the state(s) where services are to be performed. The Contractor is considered the ultimate consumer/user of all materials purchased for incorporation or used in the performance of the work and will pay tax on his purchases and will not directly bill tax to the Owner/Customer. The Contractor indemnifies the Customer from any sales and use tax liability incurred due to the performance of this contract."

**Section 10. Builder's Risk Insurance.** Section 6.1(v) of the Agreement is hereby deleted and replaced in its entirety with the following:

"Builder's Risk Insurance: Builder's Risk "All Risk" Insurance. Design/Builder shall procure and maintain, during the life of this Contract, Builder's Risk (Course of Construction), or similar first party property coverage, issued on a replacement cost value basis. The cost shall be consistent with the total replacement cost of all insurable Work included within the Contract Design and Construction Agreement Documents. Coverage is to insure against all risks of accidental physical loss and shall include without limitation the perils of vandalism and/or malicious mischief (both without any limitation regarding vacancy or occupancy), sprinkler leakage, theft, sonic disturbance, earthquake, flood, collapse, wind, fire, terrorism, lightning, smoke, and rioting. Coverage shall include debris removal, demolition, and reasonable costs for the Architect's and engineering services and expenses required as a result of any insured loss upon the Work and Project, including completed Work and Work in progress, to the full insurable value thereof."

## **II. GENERAL PROVISIONS**

The following provisions shall govern the interpretation and enforcement of this Amended and Restated Construction Amendment:

**Section 1. No Other Modifications.** The provisions of Part I of this Amended and Restated Construction Amendment, together with the Exhibits referenced therein, shall be construed as the sole extent of the modifications being made to the Agreement pursuant to this Amended and Restated Construction Amendment. Except as hereby modified, the Agreement shall continue in full force and effect in accordance with its provisions.

**Section 2. Governing Law.** This Amended and Restated Construction Amendment shall be governed by and interpreted in accordance with California law, regardless of any conflict-of-laws provisions applicable in California or any other jurisdiction.

**Section 3. Severability.** If any provision of this Amended and Restated Construction Amendment is determined to be invalid, illegal, or unenforceable as written, such provision shall be construed consistent with and to the fullest extent permitted under applicable law, and any such determination shall not affect or impair the validity, legality and enforceability of the remaining provisions.

**Section 4. Entire Agreement.** The Amended Agreement, together with the Contract Documents, constitutes the entire understanding and agreement between the Parties pertaining to the performance by Design/Builder of the services required by the Amended Agreement.

**Section 5. Counterparts.** This Amended and Restated Construction Amendment may be executed in one or more counterparts, each of which shall be deemed to be an original and all of which, taken together, shall constitute one and the same instrument. Signature pages may be detached from counterpart originals and combined to physically form one or more copies of this Amended and Restated Construction Amendment having original signatures of both Parties.

**Section 6. Due Authority of Signatories.** Each person signing this Amended and Restated Construction Amendment represents and warrants that he or she has been duly authorized by appropriate action of the Party he or she represents to execute, and thereby bind such Party to, this Amended and Restated Construction Amendment.

*[Signature Page Follows]*

***IN WITNESS WHEREOF***, the Parties have executed this Amended and Restated Construction Amendment as evidenced by the signatures of their authorized representatives below.

**EXHIBIT D**  
**Scope of Construction Work**

Public Agency hereby acknowledges and agrees that the scope of work shall be limited to, and Design/Builder shall only perform, the following:

**Project Scope 1 - Scope of Work**

Lighting Fixture Upgrades – See Schedule 1 for lighting fixture/lamp Scope of Work.

Fixture lenses – In coordination with the Public Agency, Design/Builder will document and replace damaged, missing, or discolored fixtures lenses. Replacement will be determined based upon matching lens availability and significance of the need with priority given to issues such as large cracks, missing pieces, missing lenses, or discoloration that reduces light output. Lens quantities will be limited based upon the total quantities found below.

Ceiling tiles – In coordination with the Public Agency, Design/Builder will replace tiles that are either missing or those with greater than 1.5 square inches of damaged with a best possible match to original color and pattern at each site. Water-stained ceiling tiles will be reported to the Public Agency and will not be replaced unless the Public Agency documents that specific leaks are corrected prior to the replacement work being executed on any site. Water-stained ceiling tiles with greater than 50% damage will be replaced under this scope. Ceiling tile quantities will be limited based upon the total quantities found below.

The combined allotment for ceiling tiles and light fixture lens quantity replacements per site:

Color Tunable Lighting Fixtures – Design/Builder will install up to 600 color tunable lighting fixtures in Special Education classrooms in the District. Installation includes USLED Color changing LED Troffer Retrofit Kit, or equivalent, with dimming capabilities and color tuning from 2700K to 6500K and integrated light switch for fixture control. Public Agency to provide a list of applicable classrooms to Design/Builder prior to installation.

#### ***Lighting Exclusions & Clarifications***

- Electrical wiring installation or wiring repair and conduit/raceway installation or conduit/raceway repairs are excluded.
- Fixture protective covers such as wire cages and fluorescent lamp protective sleeves are excluded.
- Lighting fixtures will not be relocated unless specifically indicated in the Scope of Work.
- Architectural, cosmetic or structural repairs, patching, and/or painting of any kind is excluded.
- Replacement or repair of lighting poles or protective bollards is excluded.
- Any repair, modification or addition to any fixture structural supports or seismic restraints is excluded.
- This project is exempt from DSA review. DSA design, submission, any related fees or any changes required by DSA are excluded.
- Replacement of switch plates, switches, twist timers, time clocks, and breakers is excluded unless specified in the scope of work.
- Additions, modifications, or repairs of dedicated emergency circuits and emergency backup systems, including egress light fixtures and battery packs are excluded.
- Theater or auditorium performance or effect lighting is excluded.
- Any delays, or additional costs associated with supply chain and shipping issues as well as governmental regulations, inclusive of but not limited to; taxes, tariffs, manufacturing, shipping, or delivery are excluded.
- Additional costs incurred for remobilization due to lack of access to required areas are excluded.
- Any costs of providing access, access control, or security escorts are excluded.
- Hazardous materials testing, handling or abatement is specifically excluded.
- Scope is based on standard second shift, Monday through Friday, 3 pm to 2 am, non-Federal Holidays. Additional labor cost due to restriction of allowable work hours is excluded, working hours shall be adjustable based upon mutual agreement by both the Public Agency and Design/Builder.
- Coordination with other projects occurring within the District has been excluded from this scope of work. Design/Builder is not responsible for delays or additional costs caused by other projects occurring within the District.
- The repair or replacement of any ceiling grid component, structural support or seismic bracing as well as any adjustments for plumb, square, or level of the ceiling grid is excluded. The replacement of ceiling tiles connected to fire sprinklers, alarms, wireless routers, or connected to any auxiliary support or device is excluded.

If HVAC unit selection is required to be changed then Design/Builder and Public Agency will work together in good faith to modify the Scope of Construction Work by finding a suitable replacement unit of same size and scope.

#### **HVAC Exclusions & Clarifications**

- Temporary electrical power or heating and cooling excluded.
  - Painting, patching, or repair or modification of any architectural elements are excluded.
  - Testing and balancing, adjustment of balancing dampers, adjusting supply or return dampers, additional repairs, or modification to equipment, ducting, controls, or other mechanical devices not included in the above Scope of Work are excluded.
  - Scope of Work includes a disconnect and reconnect of existing electrical service and assumes the existing electrical wiring conductors, electrical outlets, conduit, raceways, electrical grounding, circuit breakers, framing, HVAC equipment, and fire and life safety system outside the specified scope are in operable condition, suitable for the new connected loads and in compliance with existing codes.
- Design/Builder will document and submit to the Public Agency any items discovered outside of Scope of Work to be in need of repair during installation. Any such repairs will be the responsibility of the Public Agency to remedy in a timely manner.

- Work on the fire alarm systems is excluded, smoke detectors and other fire safety devices connected to the HVAC units within the scope will be disconnected and reconnected. Testing of fire, life, safety devices prior to and after construction is excluded.
- DSA design, submission, any related fees or any changes required by DSA are excluded.
- Any modifications to any building component including but not limited to roofing, roofing substrate, structure, or supports are excluded. The Public Agency is responsible for coordinating on roof warranties as needed.
- If Public Agency is required to perform substantial repairs on or replace any of the HVAC units in the Scope of Construction Work prior to construction starting, then Design/Builder and Public Agency will work together in good faith to modify the Scope of Construction Work by finding a suitable replacement unit of same size and scope.
- Design/Builder is not responsible for existing damage to affected areas. Both pre and post conditions will be documented.
- Existing duct work will be disconnected from the existing unit and reconnected by means of new duct transition or flexible duct connector as applicable to the new unit. No new duct work is included.
- Duct leak testing and duct sealing is excluded.
- Existing equipment curbs and/or roof penetrations for the rooftop units will be re-used. Any repairs to equipment curbs and/or roof penetrations is excluded.
- Carbon monoxide detectors are excluded.
- New HVAC Units will be provided with MERV 13 filtration as required by Title 24 2022.
- Costs incurred due to lack of access to required areas or due to access to storage areas to which materials are to be delivered are excluded.
- Costs of providing access, access control, or security escorts.
- Hazardous materials testing, any control measures, and abatement are excluded. Public agency shall provide any hazardous materials substance reports prior to work being performed.
- Coordination with other projects occurring within the Public Agency has been excluded from this scope of work. Design/Builder is not responsible for delays caused by other projects occurring within the District.

## **Building Automation System Scope**

The existing Tridium® Building Automation System (BAS) is to be expanded to provide operator user interface to the below facilities. The Tridium system based on the Niagara Framework will include control and monitoring parameters as outlined below for each facility. The existing BAS system will be revised and expanded to be programmed with temperature setup and temperature setback as well as optimized schedules. Permanent scheduling, holiday scheduling, and temporary scheduling capabilities for each control zone will be provided.

On site specific training will be provided for local staff for site specific training for BAS operation. This includes, but is not limited to, system architecture, controller and override panel operation, control drawings, device replacement, product overview and demonstration, logging on and off, system passwords, screen layout, software toolbars and menus, graphic page navigation and use, scheduling (regular, temporary, and special), and basic troubleshooting.

Communication from each building to the central workstation will be provided through the owner's wide area network.

## **Bancroft ES – New Building Automation and Integration**

A JACE BAS is to be installed with communicating network thermostats on Split Systems and rooftop units. The Mitsubishi Cassettes are to be integrated via provided Gateway that resides on the client's local network. Lighting circuits controlled through a local timeclock, will be controlled through the BAS via schedule.

Control parameters are as follows:

## **DELTA VIEW ES – NEW BUILDING AUTOMATION AND INTEGRATION**

A JACE BAS is to be installed with communicating network thermostats on RTUs. Lighting circuits controlled through a local timeclock, will be controlled through the BAS via schedules. Server room will have a monitoring temperature sensor installed and alarm when outside of temperature alarm setpoint.

Control parameters are as follows:

## Glenbrook MS – Building Automation and Integration

A JACE BAS is to be installed with communicating network thermostats on rooftop units, split system air handlers, and gym air handler. The Mitsubishi Cassettes are to be integrated via provided Gateway that resides on the client's local network. Lighting circuits controlled through a local timeclock, will be controlled through the BAS via schedules.

This site includes Rocketship Academy. They are controlled via the one JACE for Glenbrook MS and operators are able to schedule and adjust each site independently.

Control parameters are as follows:

### Rooftop Unit (Typical of 13)

## Holbrook ES - ECM 12.00 – Building Automation and Integration

A JACE BAS is to be installed with communicating network thermostats on rooftop units and split system air handlers. The Daikin Cassettes are to be integrated via existing gateway that resides on the client's local network. Lighting circuits controlled through a local timeclock, will be controlled through the BAS via schedules. The Multi-Use Building pneumatics will be removed and replaced with DDC controls. Hot water plant shall be converted to new DDC control available through the client's BAS interface. All former pneumatic devices will be controlled with communicating network thermostats.

Control parameters are as follows:

## Monte Gardens ES– Building Automation and Integration

A JACE BAS is to be installed with communicating network thermostats on split system air handlers. The Mitsubishi Cassettes are to be integrated via existing gateway that resides on the client's local network. Lighting circuits controlled through a local timeclock, will be controlled through the BAS via schedules.

The Multi-Use Building pneumatics will be removed and replaced with DDC controls. Hot water plant shall be converted to new DDC control available through the client' BAS system interface. All former pneumatic devices will be controlled with communicating network thermostats.

Control parameters are as follows:

### **Split System Air Handler (Typical of 14)**

## Sun Terrace ES – Building Automation and Integration

A JACE BAS is to be installed with communicating network thermostats on rooftop unit and split system air handlers. The Mitsubishi Cassettes are to be integrated via existing gateway that resides on the client's local network. Lighting circuits controlled through a local timeclock, will be controlled through the BAS via schedules.

The Multi-Use Building control will be removed and replaced with new DDC controls. All former pneumatic devices will be controlled with communicating network thermostats.

Control parameters are as follows:

### Rooftop Unit (Typical of 1)

### CONTROLS CLARIFICATIONS

- Existing Tridium controlled campus systems shall be modified for consistent graphical interfaces, time of day scheduling, and alignment for entire BAS interface. The existing controllers and interfaces are to be repurposed and are expected to be in working order. The scope of this work will not alter the physical aspects of the existing BAS systems and does not include any costs for any physical repair of these existing systems.

- To the best of Schneider Electric's knowledge, the points above represent all that are necessary to effectively operate the indicated systems. If additional points are required to operate the systems specifically indicated above per Schneider Electric's Sequences of Operation, they will be incorporated under this scope of work. If any of the points indicated above are unable to be included within the final system, such points shall be excluded from this scope of work. Points associated with new mechanical equipment (if applicable) are subject to change based on those points available from the equipment ultimately furnished and the points deemed necessary for operation of the system.
- Design/Builder may reuse existing equipment including (but not limited to) valves, dampers, and actuators for the execution of this contract, and assumes the equipment or devices are in good working order. Should the equipment or devices require repair or replacement, this will be the responsibility of the owner unless specifically indicated otherwise in the scope of work.  
Design/Builder will create an equipment deficiency report (EDR) to provide the owner with written notification if such equipment or devices are identified.
- Design/Builder will only control equipment and/or devices shown in the Scope of Work. Equipment and devices not in the Scope of Work are excluded. Design/Builder is not responsible for the functionality of such equipment even if such equipment is operated by an existing BAS.
- Demolition of the existing HVAC controls / building automation equipment will be performed as needed to implement the new DDC system installation (reuse of enclosures, wire, and end devices will be solely at the discretion of Design/Builder). The total demolition of any remaining abandoned or obsolete control elements will be the responsibility of the owner, unless otherwise stated.
- Design/Builder is not responsible for safeties on existing equipment including smoke detectors, fire alarm interlocks, and low or high temperature cut-outs or any life safety equipment. Pre and post testing of smoke, fire, and life safety systems will be the responsibility of the customer and the sequence will be provided to Design/Builder. Where life safety equipment utilizes compressed air (pneumatics), the source of the air, logic, and actuators will not be removed or modified within the execution of the project.
- Exhaust fans controlled by occupancy sensors or local switches, that are process / life safety related, or that do not move air beyond the building envelope will not be integrated with the building management system.
- Design/Builder will not be responsible for any modification or expansion of the owner's existing WAN/LAN for the execution of this project. Owner to provide Design/Builder with designated open port(s) as required at existing network switches in all facilities within this scope of work. Design/Builder to provide CAT5e Ethernet cable from control equipment to Owner network switch.
- Where new control panels are to be installed, conduit will be installed from the panel knock-out to a height of 8' or the level of the finished ceiling if present – whichever is lower – for all low voltage wiring. Conduit will not be required in other applications unless otherwise indicated by the scope of work above. All wiring shall be in compliance with local codes and authorities having jurisdiction.

#### **CONTROLS EXCLUSIONS**

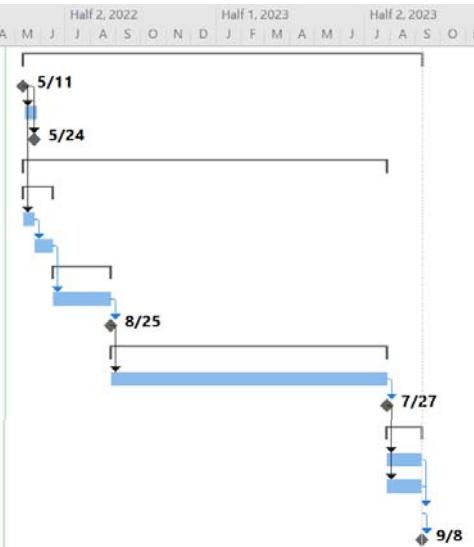

- Asbestos testing, containment or abatement of any kind is excluded.
- Costs of providing access, access control, or security escorts not specified in the Scope of Work are excluded.
- Hydronic / airflow testing and balancing or adjusting air flows on HVAC equipment will not be included as part of the controls scope of work.
- Repair of existing HVAC and control equipment beyond the scope of work above is excluded.

- Any repair patching or painting of architectural elements, existing walls, sheetrock, plaster, brick, wood, etc is excluded. Patching or painting any wall finishes due to the removal of existing thermostats (for retrofit with DDC Sensor or new thermostat) is excluded.

***Project Fee***

**Project Fee:**

Total Project Fee shall be: \$49,428,671.

The Project Fee is comprised of (1) \$24,104,012 for Project Scope 1, (2) \$250,000 for two years of Energy Management Services, and (3) \$25,074,659 for Project Scope 2.

***EXHIBIT G***  
***Performance Assurance Support Services Agreement***

***Section 1 – Services During Initial Term***

ESCO shall provide the Performance Assurance Support Services (the “Services”) defined below to Customer during the Initial Term beginning May 16<sup>th</sup>, 2022.

**Initial Term - Contract Years 1 and 2**

Schneider Electric has assembled a specialized team to provide a variety of services to assist in reducing energy and operating costs, while maintaining the highest levels of occupant comfort, safety, and productivity. Energy Management Services will be implemented across all sites with an emphasis on those with the greatest opportunity for savings. This implementation of Energy Management Services includes the following services:

**Resource Advisor Subscription**

Schneider Electric will provide an annual subscription to Resource Advisor (Schneider’s utility management software) to Mt. Diablo USD. Data can only be updated on this website if utility bills and other necessary information are provided. If bills and other necessary information are not provided, Schneider Electric is not responsible for maintaining updated information in the portal until the missing data is provided. All data will be electronically extracted from vendor websites. This software will house Mt. Diablo USD’s utility data including electric, solar, water, and gas.

**Resource Advisor Implementation**

Schneider Electric will provide up to 220 hours of annual service to ensure optimal operation and usage of the Resource Advisor platform. This time will be utilized for the following activities:

- Utility Data Input/Update – Schneider Electric will verify all electric, natural gas, and water utility accounts are accurately tracked within Resource Advisor. Utility data will be updated monthly and data integrity verified.
- Solar Account Integration – Schneider Electric will identify and capture historical solar data and track within Resource Advisor.
- Mt. Diablo USD Staff Training – Schneider Electric will conduct three training sessions either in person or virtually to support the Mt. Diablo team in order to ensure staff understanding of the Resource Advisor platform.
- Build Custom Dashboards – Schneider Electric will work with Mt. Diablo USD to identify the data that will be support their responsibilities and create custom utility dashboards to display dynamic results.
- Confirm Solar Rate Conversion – Schneider Electric will verify all electrical solar accounts are on the proper rate.
- Evaluate Current Utility Contracts – Schneider Electric will verify all accounts are being billed on the most beneficial rate tariff.

**Energy Monitoring and Resource Management**

Upon implementation and startup of Resource Advisor, Schneider Electric will provide services to assist Mt. Diablo USD in the monitoring and management of its energy consumption. The goal of these services will be to establish a baseline for data driven analysis and benchmarking, identify savings opportunities, and assist in the identification/prioritization of capital improvement projects based upon the associated energy impact. This will be

accomplished through dedicating 189 hours of annual service to the following activities:

- Identify Mt. Diablo USD's Efficiency Goals – Schneider Electric will coordinate with Mt. Diablo USD staff to determine the information/data that would be most meaningful for future planning and will make recommendations to minimize spending, improve efficiency, and assist in project prioritization.
- Develop Energy Baseline – Schneider Electric will collect, chart, graph, and display historical data to investigate anomalies and savings opportunities. Schneider Electric will establish an energy baseline for comparison with future performance.
- Perform Benchmarking Services – Schneider Electric will compare Mt. Diablo USD's utility consumption against districts of similar size to determine overall level of efficiency and identify opportunities for savings along with a plan to achieve them.
- Detailed Electric Utilization Analysis – Schneider Electric will combine site audits, discussions with Mt. Diablo staff, interval data observations, and raw data analysis to develop a complete understanding of electric profile.
- Detailed Water Utilization Analysis – Schneider Electric will combine site audits, discussions with Mt. Diablo staff, interval data observations, and raw data analysis to develop a complete understanding of water consumption.
- Outline Environmental Impacts – Schneider Electric will provide reporting at the request of Mt. Diablo USD leadership and transfer savings into measurable impact of GHG reduction.
- Energy Conservation Measure (ECM) Recommendations – Schneider Electric will develop a list of recommended ECMS per site for the district.

#### Site Visits and Other Activities

Central to the success of this Energy Management Services program are detailed site visits and energy audits that connect the data and analysis completed as part of this program to the real world. This crucial component of the program will require 320 hours of annual service allocation. Site visits and other related support services encompass the following:

- Eight (8) Comprehensive Site Audits – Schneider Electric will confirm site conditions align with the data. Audits will focus on water/electric consumption and related infrastructure.
- Submetering Evaluation of Leased Spaces (evaluate revenue potential) – Schneider Electric will determine current contractual arrangement with entities leasing Mt. Diablo USD space and quantify the financial impact to the district if submetering is implemented
- Identify Mt. Diablo USD Eligible Funding (grants, rebates, etc.) – Schneider Electric will investigate any grants and rebate opportunities that Mt. Diablo USD may be able to capture based on current initiatives.
- Mt. Diablo USD Staff Interviews – Schneider Electric will work with Mt. Diablo USD leadership and staff to understand current operational practices, analyze data, and make recommendations to improve efficiency.

Equipment or control deficiencies that are identified at each facility will be documented. While Schneider Electric will make solution recommendations and can assist in the execution, it is the sole responsibility of Mt. Diablo USD to fund and facilitate equipment replacement or repair.

#### Remote Project Management

We at Schneider Electric believe in the utmost transparency in the services we are offering. All of the services listed above are delivered with excellence thanks to coordination efforts that take place within our office. Project management is not necessarily a portion of this service that will be apparent but it is absolutely critical to the effectiveness and timeliness of the solutions we provide.

## **Section 2 – Services After Initial Term**

After the end of Initial Term and each subsequent term thereafter, Public Agency may either (1) renew the same level of Service as set forth in the Initial Term or previous term, (2) change the Service level by selecting one or more of the options defined below, or (3) terminate this Agreement in accordance with the termination provisions contained herein. All prices will be calculated at the time of renewal.

### **Contract Year 3 Recommended Services- \$175,117**

#### Resource Advisor Subscription
