Subject: MDUSD Update on Shut-downs

This message is being sent to all MDUSD Staff.

Good morning Staff,

At this time, the District has closed North Gate High School. All other schools remain open at this time, however, communication will follow. If you are receiving calls and/or emails, or other forms of communication from parents and staff you can disclose the following information.

“As of the current time all MDUSD schools are closed, with the exception of North Gate High School. Please note that Foot Hill Middle School and Walnut Acres Elementary School are without power, however school remains in session. We continue to work with Contra Costa County Fire Department and other local agencies to ensure we are keeping our children safe. Children are able to be picked up by their Guardian(s) and their absence will be excused for the day, if the Parent/Guardian would prefer the child/children to be at home. At this time, staff are expected to be at work until further notice. If you have questions or concerns please contact the Superintendent’s office at 925-682-2000 x. 4000.”

Thank you for your patience and cooperation during this time.

Best,

Toni Shay

Subject: Schools Open on Monday, October 28, 2019!

**We are planning on having all
Mt. Diablo Unified Schools
Open
on Monday, October 28, 2019!**

Dear All,

As predicted, the wind has been in full force over the weekend. Several of our neighborhoods throughout our community did have power shut down over the weekend as part of PG&E's "Public Safety Power Shut-down." Several other communities also lost power to other issues such as downed trees or sporadic fires. Unfortunately, this may be our new "normal," given the information we have received from PG&E.

I have been in contact with our Maintenance and Operations Department, who have also been in communication with PG&E about the power shut-downs. Director Richard Jackson and his team have continued to track any power outages and any potential issues due to the high winds at our schools. Our goal is to ensure that our schools are absolutely safe for Monday, October 28, 2019.

I have been in communication with the County Superintendent, Lynn Mackey, and most of the Contra Costa County Superintendents, and we are all working together as we learn how to adjust to these new circumstances throughout California.

I believe that our students and families look to us to remain calm, stay open if at all possible, and provide a sense of continuity for our children.

I know that we have many staff members who are personally without power in their homes and may be worried for extended family members who are impacted by fires and power outages across California as well. We are keeping everyone who has been impacted by these events in our thoughts, and know that it is never difficult to work through issues that seem to take control out of our hands.

We will continue to provide information to the the community and staff via email, our website and with updates on social media. We are also in constant contact with the Contra Costa County Office of Emergency Services. and will provide you with updates should things change.

I want to thank you all in advance for your flexibility, patience, caring and professionalism as we start another challenging week. We know that positive adult attitudes make challenging circumstances easier to mitigate for our students, their families, and our colleagues.

I sincerely appreciate what amazing students, parents, and employees we have in the Mt. Diablo Unified School District.

Mount Diablo Unified School District would like to continue connecting with you via email. If you prefer to be removed from our list, please contact Mount Diablo Unified School District directly. To stop receiving all email messages distributed through our SchoolMessenger service, follow this link and confirm: [Unsubscribe](#)

SchoolMessenger is a notification service used by the nation's leading school systems to connect with parents, students and staff through voice, SMS text, email, and social media.

Subject: All Mt. Diablo Unified Schools Open- Air Quality Update 10/28/19

-The following is a message from the Superintendent's Office-

Dear MDUSD Staff,

We are continuing to track the Air Quality Index (AQI) for Contra Costa County each hour. While we are aware that advisories have been put out by the Contra Costa County Offices of Emergency Services our primary goal was to provide a safe place for students to be today, and to work to normalize events as much as possible.

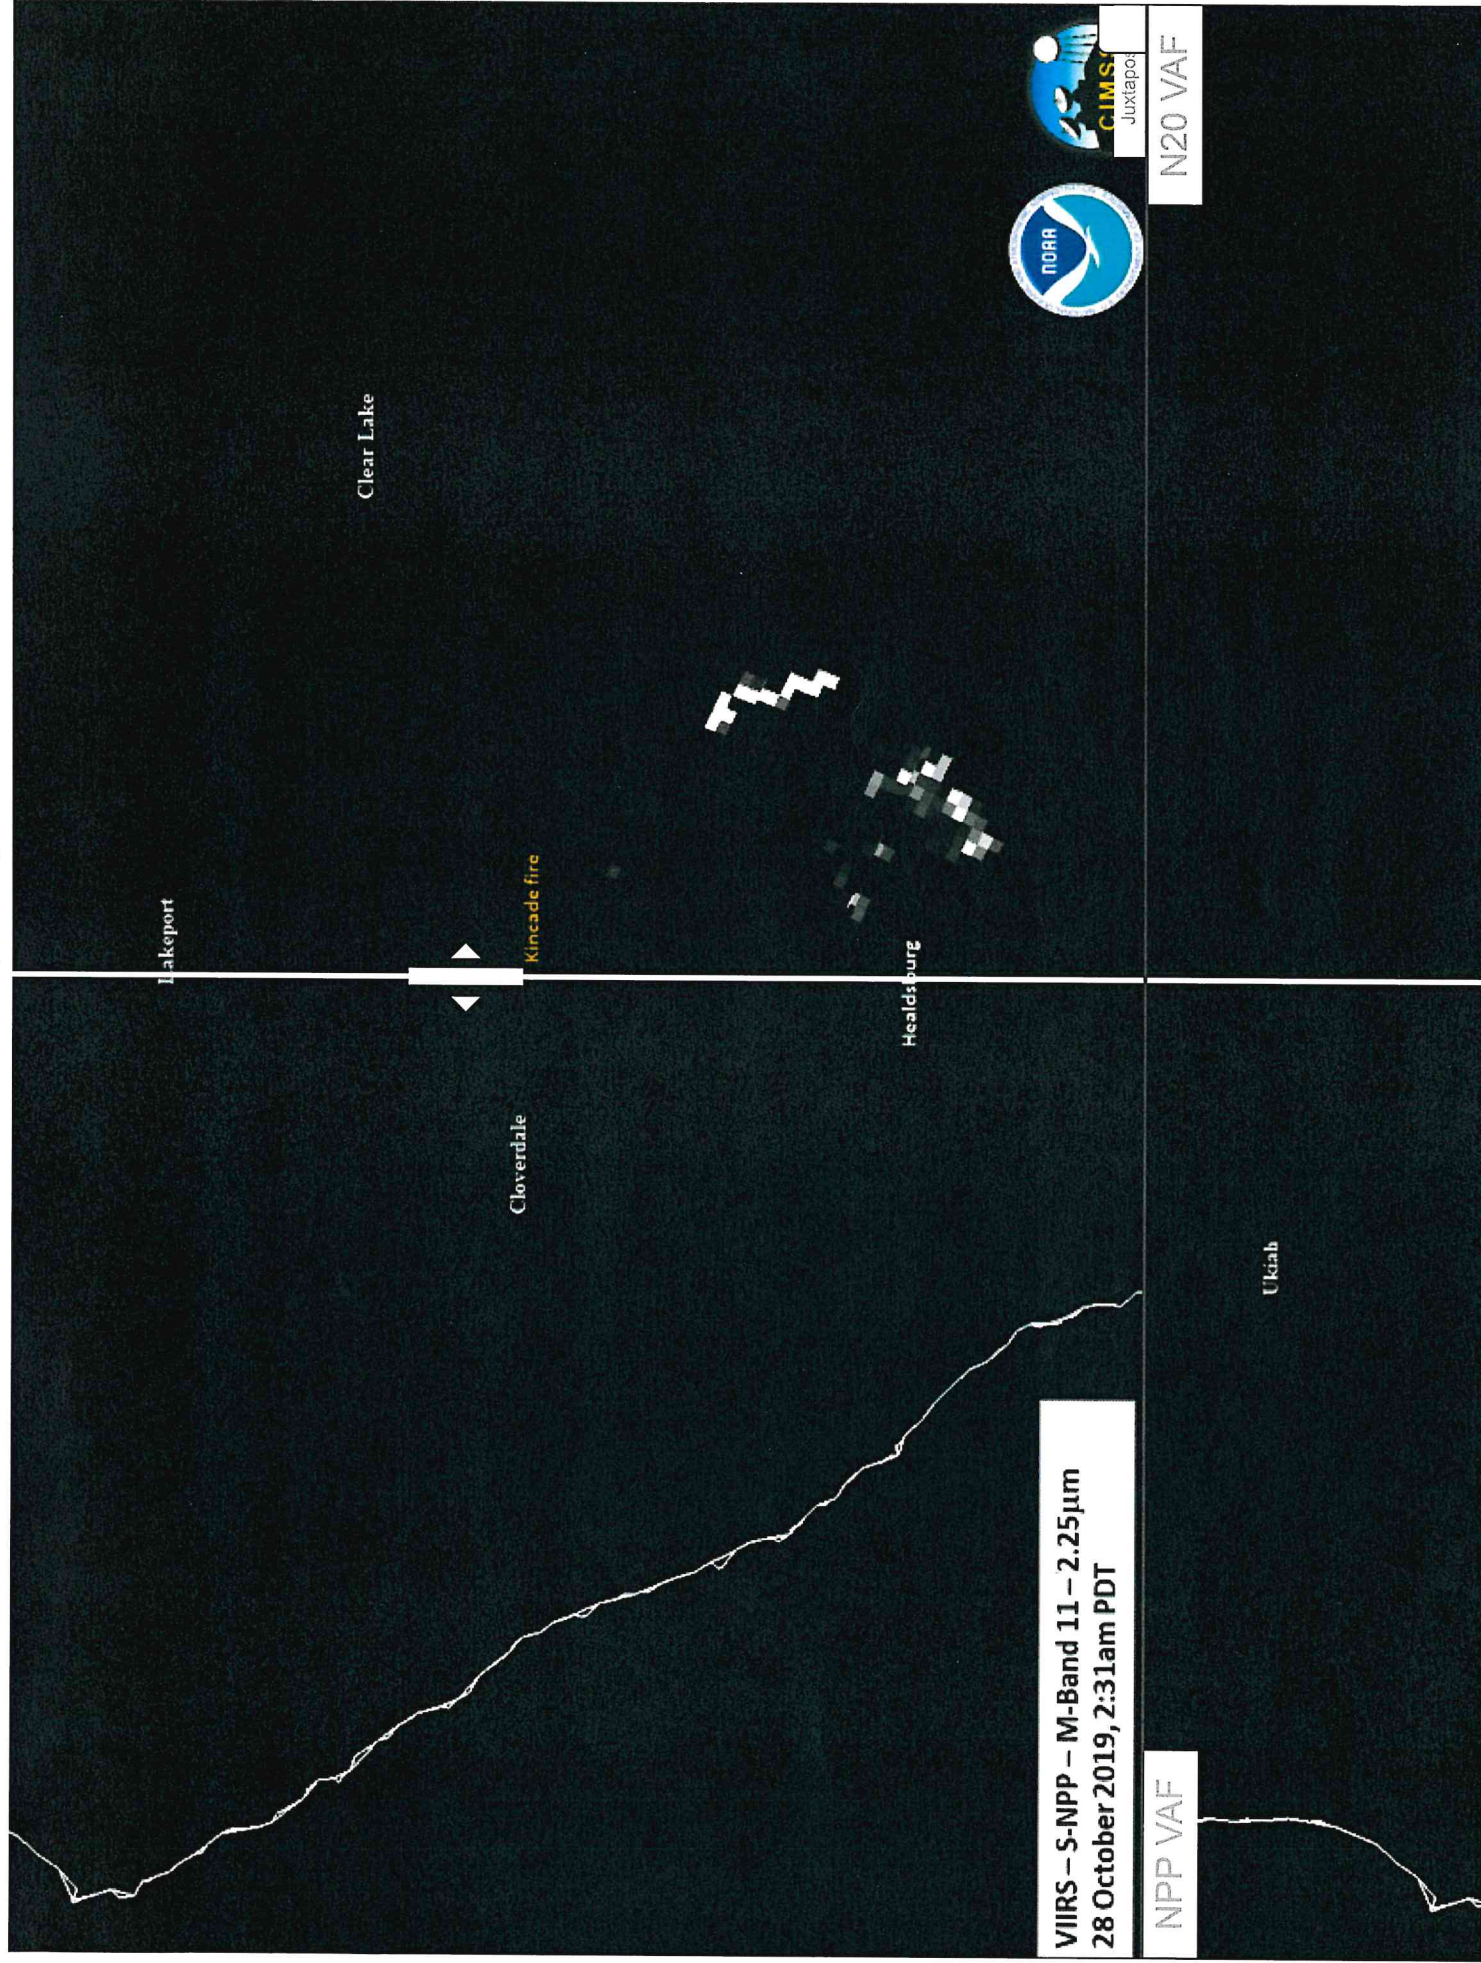

Our schools have been provided with information and guidance regarding limiting school activities during poor air quality days. We are continuing to work to improve our practices and processes, and appreciate the feedback from our community regarding these issues. We understand that a number of families with students with sensitive issues may make the decision to keep their students home today, and we are planning to excuse absences today as the AQI is the primary reason for the absence.

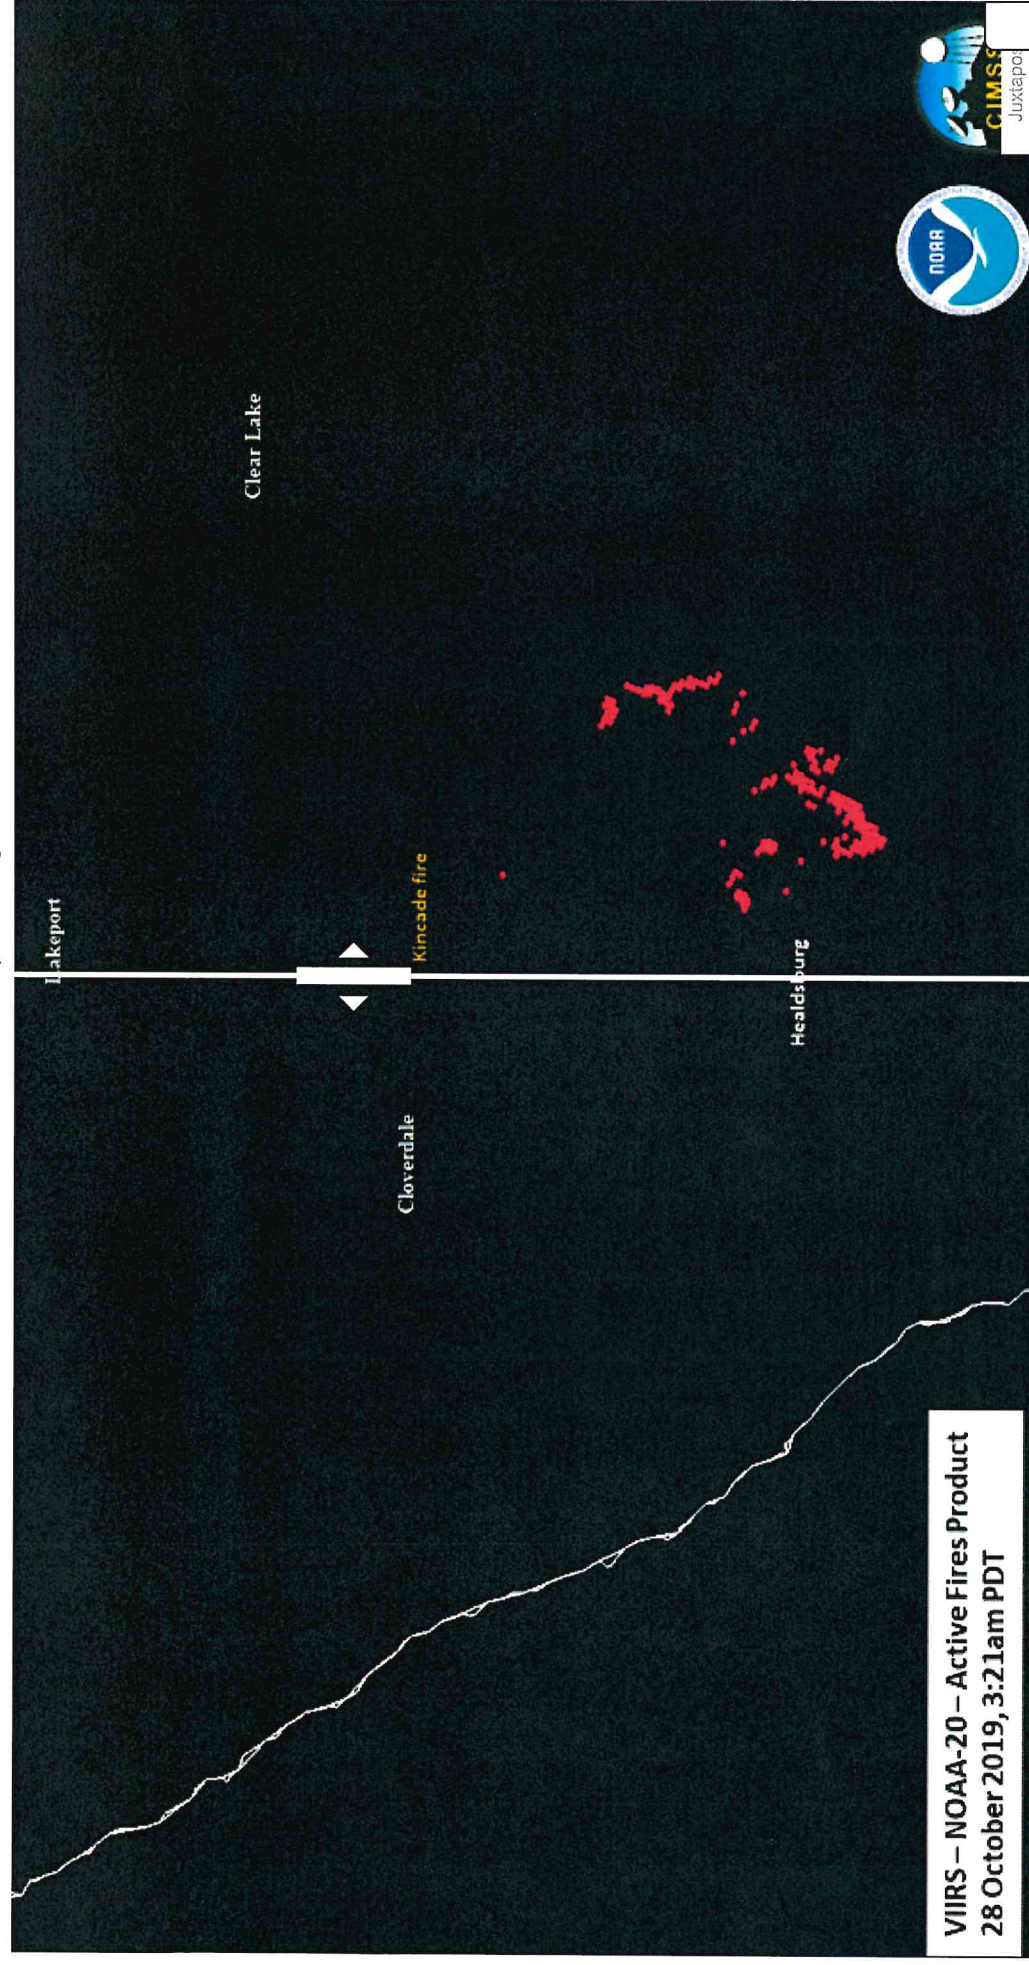

We are aware that the power to Northgate High School has not been turned back on, and this has created a number of issues specific to that site. We do understand that a number of families have decided to keep their students home, or to pick their children up from school today. Again, our intent was to ensure that all students did have a safe place to be with adult supervision. Our administrative team, educators, and support staff are to be commended for being so flexible during this time. We are working to better understand the situation, and will update families directly from the site within the hour.

At the time of this update Foothill Middle School and Walnut Acres Elementary are also without power. The MDUSD Food and Nutrition Services Departments are working to ensure that meals will be provided to students who are in attendance.

I again want to thank you all in advance for your flexibility, patience, caring and professionalism as we continue through the process of responding to these continuing challenging circumstances. We know that positive adult attitudes make challenging circumstances easier to mitigate for our students, their families, and our colleagues.

I sincerely appreciate what amazing students, parents, and employees we have in the Mt. Diablo Unified School District.

VIIRS – NOAA-20 – Active Fires Product
28 October 2019, 3:21am PDT

One cannot necessarily see the smoke in the DNB due to the moon illumination being only 1% (Waning Crescent) illuminated as well as the fact the winds were not very strong, meaning that the smoke would settle into the valleys. In addition, while smoke is relatively optically thin in the IR channels, note the warmer temperatures in the valleys in the I05 (11 μ m) that appear to move between the NPP and NOAA-20 passes. This could be an indication of warm smoke coming from the fires that are being seen in the thermal channel sliding down the mountain valley.

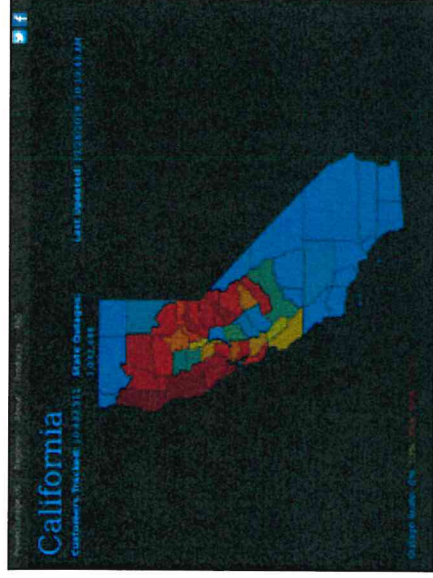

Power outages

As mentioned above, The plan was to cut off power to **940,000** customers. At ~3:30am PDT, which was about the time of the NOAA-20 overpass, roughly **1,032,448** customers were without power, primarily in northern California, as seen in the screenshot from [poweroutage.us](https://www.ssec.wisc.edu/jps-sdoc/posts/2019-california-wildfires/kincadee-fire-and-california-power-outages-on-28-october-2019/),

with virtually all of them being from PG&E. That is roughly **20% of all PG&E customers and about 10% of all customers in all of California.**

Screenshots from poweroutages.us on 28 October 2019 at ~3:33am PDT

Outages from the Pacific Gas and Electric outage website taken at approximately 3:30am PDT this morning also showed a similar distribution of outages.

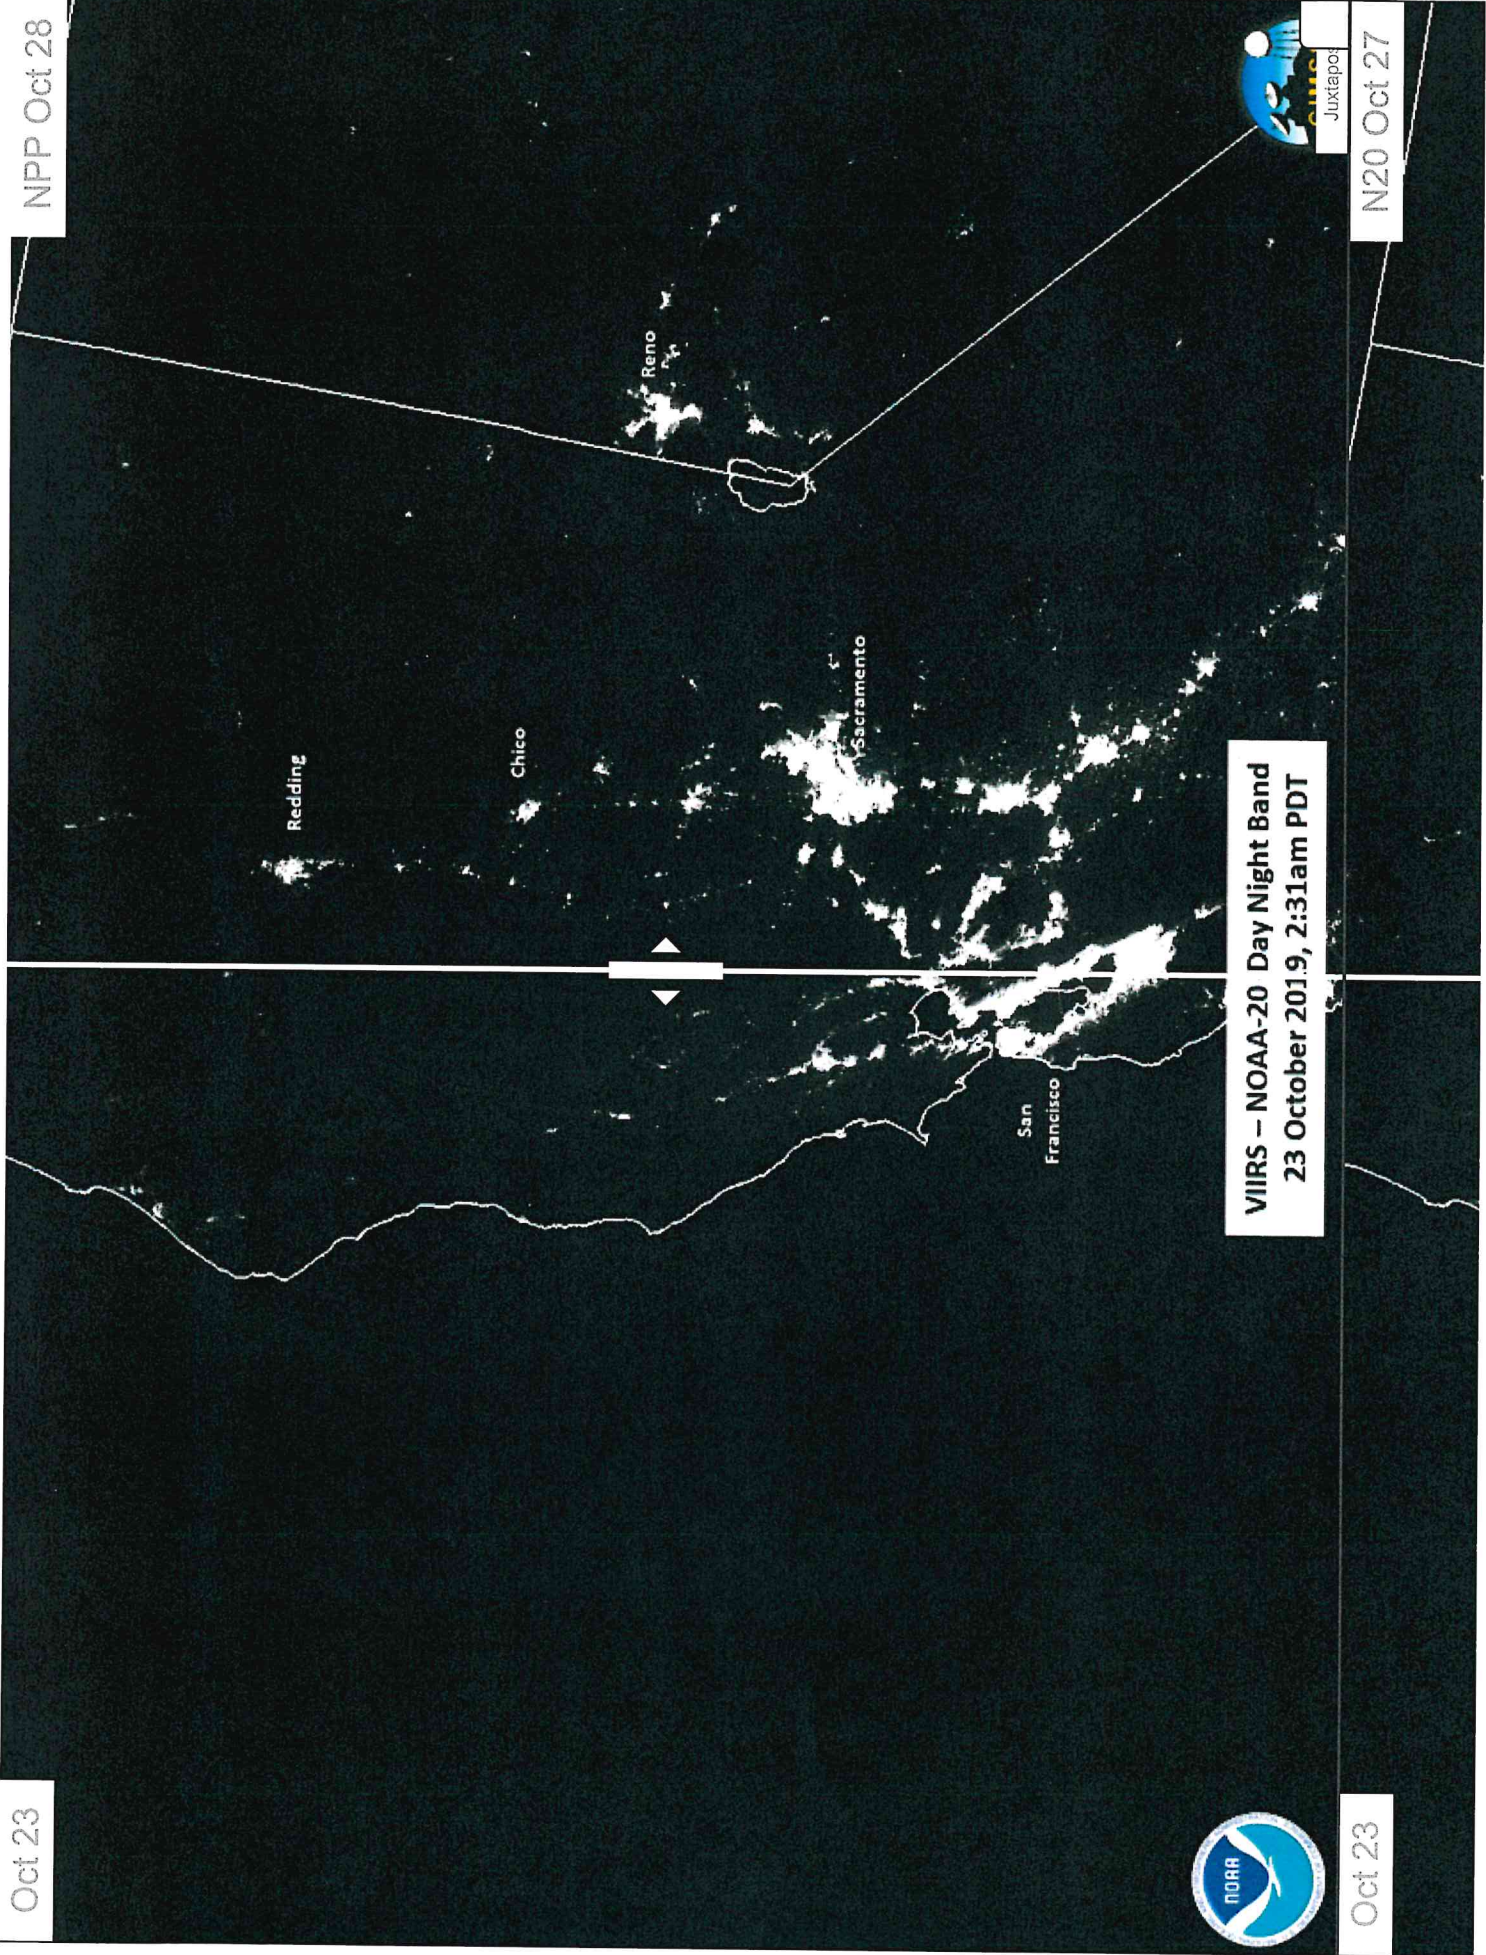

Screenshots from PG&E's Outages tracker website on 28 October 2019 at ~3:30am PDT

A zoomed out view of northern California, as compared to 23 October 2019, clearly shows that the outages in the same areas as the power trackers and consistent with the areas from [27 October 2019](#). Note that there are areas of cirrus over the Sierras that could mask out some weaker case. Also, note that you can see the Cypress Complex fire in the DNB imagery in the 28 October imagery.

Oct 23

NPP Oct 28

Oct 23

N20 Oct 27

As of the fire incident update at 7am PDT, the evacuation orders have been expanded down to parts of Santa Rosa and evacuation warnings were issued for the city of Calistoga and parts of Napa Valley. A Red Flag warning will continue through the morning of 28 October with the possibility of 40-50 mph wind gusts through the narrow roads and steep terrain. Coupled with low humidity, this makes conditions favorable to the growth of the fire. CalFires is continuing to mitigate structure threats and find opportunities to construct control lines. Approximately 4,150 personnel are assigned as of the 7am update with 10 helicopters working fire suppression.

The Satellite-based Disaster Outreach Coordinator (SDOC) JPSS Risk Reduction product is run at Cooperative Institute for Meteorological Satellite Studies

PG&E is Monitoring a Severe Wind Event Later this Week That Could Impact Nearly 30 Counties Across Northern and Central California

National Weather Service Has Issued a Fire Weather Watch for Vast Portions of Northern California; PG&E's Emergency Operations Center is Open and Monitoring the Situation

Release Date: October 07, 2019
Contact: PG&E External Communications (415) 973-5930

SAN FRANCISCO, Calif. — PG&E announced today that its meteorological and operations teams in its Emergency Operations Center continue to monitor a potentially widespread, strong and dry wind event Wednesday morning through Thursday afternoon. The event will impact northern, central, coastal and Bay Area counties across much of PG&E's service area.

In response to this anticipated event, the National Weather Service has issued a Fire Weather Watch for vast portions of Northern California for midweek. The National Interagency Fire Center's Geographic Area Coordination Center is also forecasting significant fire potential across Northern California beginning on Wednesday of this week.

Due to the forecasted extreme weather conditions, PG&E is considering proactively turning off power for safety, and implementing a Public Safety Power Shutoff, across portions of approximately 30 northern, central, coastal and Bay Area counties.

Portions of counties that may be impacted include, but is not limited to: Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, El Dorado, Glenn, Lake, Mariposa, Mendocino, Napa, Nevada, Placer, Plumas, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Shasta, Sierra, Solano, Sonoma, Stanislaus, Tehama, Tuolumne, Yolo and Yuba.

The main period of weather risk is early Wednesday morning through Thursday midday. The dry, windy weather pattern is expected to reach from the northern portions of PG&E's service territory and down through the Sacramento Valley before spreading into the central areas of the state including most of the Bay Area.

PG&E will continue to monitor weather conditions and will be providing additional information regarding affected area this afternoon.

How Customers Can Prepare

As part of PSPS preparedness efforts, PG&E is asking customers to:

- Update their contact information at pge.com/mywildfirealerts or by calling 1-866-743-6589 during normal business hours. PG&E will use this information to alert customers through automated calls, texts, and emails, when possible, prior to, and during, a Public Safety Power Shutoff.
- Plan for medical needs like medications that require refrigeration or devices that need power.

Energy Facts

By going solar, you can offset more than a pound of CO₂ each solar kilowatt hour.

- Identify backup charging methods for phones and keep hard copies of emergency numbers.
- Build or restock your emergency kit with flashlights, fresh batteries, first aid supplies and cash.
- Keep in mind family members who are elderly, younger children and pets. Information and tips including a safety plan checklist are available at pge.com/wildfiresafety.
- Learn more about wildfire risk and what to do before, during and after an emergency to keep your family safe at PG&E's Safety Action Center.

While customers in high fire-threat areas are more likely to be affected by a Public Safety Power Shutoff event, any of PG&E's more than 5 million electric customers could have their power shut off because the energy system relies on power lines working together to provide electricity across cities, counties and regions.

Generator Safety

Backup electric generators can be a part of any preparedness plan, but they can also pose unique safety hazards.

It's important to understand how to safely operate your generator before an emergency occurs. This means doing regular safety checks and being sure you have enough fuel to last a few days. If you don't understand how to use your generator, you risk damaging your property, endangering your life and endangering the lives of others.

Position your generator where its exhaust can vent safely to prevent carbon monoxide poisoning, which can be fatal. Never run a portable generator in the garage or in the rain, and never store generator fuel in the house.

Additional tips on the safe use of generators can be found at PG&E's Safety Action Center at www.safetyactioncenter.pge.com.

About PG&E

Pacific Gas and Electric Company, a subsidiary of PG&E Corporation (NYSE:PCG), is one of the largest combined natural gas and electric energy companies in the United States. Based in San Francisco, with more than 20,000 employees, the company delivers some of the nation's cleanest energy to nearly 16 million people in Northern and Central California.
